EULiST  
STUDENT  
CONFERENCE

WELCOME

**Welcome to Technische Universität Wien for the first edition of the EULiST Student Conference!**

**The Interdependence of Society and Technology: A Call for Comprehensive Technological Education**

In today's fast-paced world, the close relationship between society and technology is more apparent than ever. This interdependence highlights the growing need for well-educated individuals who understand this connection. As a coalition of ten esteemed European technology universities, we are dedicated to providing young professionals with a top-quality technological education that prepares them for this complex world.

We recognize that modern technologies and ideas are deeply connected to our social, cultural, and economic fabric. This understanding shapes our approach to education, emphasizing international collaboration and a global perspective.

To explore the relationship between society and technology, we have organized a unique conference. This event will bring together students, university professors, researchers, and esteemed international guests, including winners of prestigious European awards. You will have the opportunity to exchange ideas and perspectives, shedding light on the many ways society and technology are interconnected.

We look forward to welcoming you to Vienna and engaging in a meaningful dialogue about the future of technological education.

STUDENT  
CONFERENCE

## Further information:

Please look at the full package of further information. We will begin with a more detailed explanation of each of mentioned formats. Later we will go on to describe the abstracts of all the workshops of the event.

### OPENING AND CLOSING

The opening and closing events, highlighted in dark blue, will feature speeches from key members of the EULiST alliance. More specifically:

- Opening Ceremony: Official welcome and keynote.
- EULiST Panel Discussion: Introduction to “What EULiST is”.
- Closing Remarks: Reflections on the conference and the way forward.

### WORKSHOPS

In the workshops, you'll be divided into smaller groups of 20-40 students for interactive sessions designed to enhance your critical thinking as well as your soft and hard skills. Topics will focus on linking society and technology, covering areas such as sustainability, architecture and urban planning, materials, artificial intelligence, digitalization, robotics, augmented reality, microtechnology, factory systems, clinical decision making, research, education, student mobility, career counselling and presentation skills among others.

### THE PITCH

There you can find 6 rooms, each hosting 7 pitchers.

The session will commence with a 10-minute introduction by our team and **TEDxTUWien**. Following this, there will be a 5-minute buffer time for participants to move to their respective rooms and prepare. Each pitch will last for 10 minutes, followed by a 5-minute Q&A session. The entire session will span 2 hours, with a 30-minute break in between.

### THE FAIR

The EULiST Fair is an event where you can roam around the room and discover the projects of your fellow students. You can engage in one-to-one discussion with the presenters, who will be more than happy to present you their works.

Further  
information:

## SOCIAL PROGRAMME:

To start the event, nothing better than some fun activities to get to know the other students attending the conference.

### IceBREAKER

The goal is to get to know each other. No special requirement except curiosity to get to know your fellow participants.

### International Evening

This is your time to shine and showcase typical beverages or snacks or an item you feel represents your country of choice. Therefore, we ask you to bring something from your home country and/or the country of your university.

### City Rallye and Pub crawl

You have spent now three days in the beautiful city of Vienna. Now it's time to see some of its highlights. For that you will form teams completing challenges while learning some interesting facts about your surroundings. Afterwards, if you like, the challenge continues in Vienna's bar district. Your goal is to visit as many bars as possible and complete activities or maybe you find just the place for your team and spend the rest of the evening there?

### Goodbye party

Yesterday you experienced Vienna and its magnificent historical layout. Tonight, you have the opportunity to join one of TU Wien's iconic student events. The civil and environmental engineers together with the spatial planners are having their semester closing event right on campus. Enjoy cool drinks and DJs while getting a chance to dive in TU Wien's famous student life. FYI: The event lasts until 10 or 11 pm (confirmation pending).

## Keynote speeches

**4 JULY AT 10 am IN KUPPELSAAL**  
**PETER LORENZ**  TECHNISCHE  
UNIVERSITÄT  
WIEN

- How I came to architecture
- Philosophy/Ethics
- Architecture Future
- Projects

### PETER LORENZ LECTURE

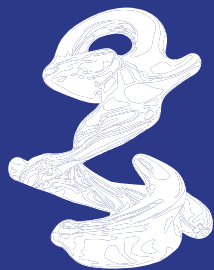

Lorenzateliers was founded in Innsbruck in 1980 and has been based in Vienna since 1990.

Of more than 500 works, almost a third have been realised in Austria, Germany, Italy and Slovenia: urban planning, architecture, interior design.

#### The best-known projects include

- The “Bora projects in Raubling, Niederndorf and Herford”
- The “Medical University in Linz”
- “School on the Vienna market”
- the “Factory for Young People” in Trieste
- the “Sportcity Ilirija” in Ljubljana
- as well as several subsidised housing developments in Vienna, such as the “Nussbaumallee”.

Peter Lorenz’s professional profile includes constant travelling, teaching and lecturing as well as passionate criticism and a willingness to discuss the phenomena of nature, the city, architecture, beauty and their interrelationships. Lorenz is also a frequent juror on design advisory boards and architectural competitions.
