

# 1°Edition EULiST

## PROFESSIONAL FACULTY DEVELOPMENT WEBINAR SERIES

Promoted by Task Group 3.2 - Innovative  
Teaching and Learning Methodologies

**Join us in developing new and creative  
methods for teaching and learning to  
empower and professionalise educators!**

### About the webinar series

**Experts** of innovative teaching and learning methodologies share their experiences highlighting achievements and failures.

**Workshops** and **training sessions** on specific topics will be offered to support implementing new approaches in every day teaching.

### Why Attend?

**Inspiring Contributions:** join talks and webinars for new perspectives.

**Networking:** connect with like-minded experts.

**Professional Development:** expand your skills and improve your teaching methods.

### Where

via **Stud.IP** under working group "EULiST Webinars on Professional Faculty Development"

## Spring/Summer 2025

**Claudia Migliaccio, Institut Mines-Télécom**

### Challenge-based Learning: an active pedagogy in Higher Education\*

Let's explore this active teaching and learning pedagogy paradigm, in order to understand what its use could be for university students and teachers.

*This seminar will be held in person during General Assembly in L'Aquila, Aula magna Centro congressi "Luigi Zordan" & on YouTube.*

**Marjaana Kareinen, Lappeenranta-Lahti University of Technology LUT**

### Positive approach towards AI in teaching; opportunities and challenges

Generative AI has been an active part of our university life for more than two years now.

A positive approach to teaching is a natural way to approach it, but it has its pros and cons.

This webinar provides some insights into both factors.

What are the opportunities and how to deal with challenges.

**Claudia Migliaccio, Institut Mines-Télécom**

### Challenge-based learning: a practical approach\*

Discover some concrete examples of implementing challenge-based learning in Higher Education: try, fail and learn, for teachers as well as students.

*\*These seminars are an introduction to the topic, followed by proper training sessions for those of you who are interested in Challenge Based Learning.*
